Some Features

Highlighted Features

AI Support

Going beyond traditional document management, Documenos acts as an intelligent system that manages the information in documents and their entire lifecycle.

Electronic Signature

Electronic signatures are created and stored in the XAdES, CAdES, PAdES and JAdES formats defined by eIDAS, using the DSS library developed by the European Commission.

Multi-Company Infrastructure

Supports a multi-company structure that allows several companies belonging to a holding to work securely on the same system.

Rights Management

Manage access through advanced authorisation tools and gain granular control over viewing, editing and sharing permissions for all digital assets.

Petabyte Archiving

Easily manages hundreds of millions of digital assets. Supports unlimited horizontal cluster scaling and provides high-speed access to petabytes of data and secure long-term preservation without compromising system performance.

All Features

documenos
